

## Open Access, Copyright, Deposit, and Archival Policy

Last updated: July 24, 2023

### Open Access Statement

[Andover House Inc.](#) journals provide full and immediate open access to all their articles on the publisher's and on the journals' websites.

Open access means that all content is freely available without charge to the user or his/her institution. Users are allowed to read, download, copy, distribute, print, search, or link to the full texts of the articles or use them for any other lawful purpose without asking the publisher's or the author's prior permission. The Open Access Policy also grants **Andover House** the right to license articles for free under the same conditions. The journal/publisher is not responsible for subsequent uses of the work.

### Copyright Policy

Copyrights of all articles published in Andover House journals are retained by the authors, with first publication rights granted to the journal. ON JUNE 1, 2023, THE JOURNAL CHANGED ITS COPYRIGHT POLICY FROM [Creative Commons Attribution-NonCommercial-ShareAlike 4.0](#) (CC BY-NC-SA 4.0) TO [Creative Commons Attribution-NonCommercial 4.0](#) AND ALL ARTICLES ARE NOW PUBLISHED UNDER THIS CC BY-NC 4.0 INTERNATIONAL LICENSE. This means that users are free to *share* (copy and redistribute the material in any medium or format) and *adapt* (remix, transform, and build upon) the material, and the licensor cannot revoke these freedoms as long as you follow the license terms:

*Attribution* — You must give appropriate credit, provide a link to the license, and indicate if changes were made. You may do so in any reasonable manner but not in any way that suggests the licensor endorses you or your use.

*NonCommercial* — You may not use the material for commercial purposes.

Authors have the right to reuse, republish, archive, and distribute their articles after publication and undertake to permit others to distribute, remix, adapt, and build upon this work non-commercially, provided the original work is properly cited.

Users may not apply legal terms or technological measures that legally restrict others from doing anything the license permits. If material is not included in the article's Creative Commons license and your intended use is not permitted by statutory regulation or exceeds the permitted use, you will need to obtain permission directly from the copyright holder (i.e., from the Authors).

### Deposit Policy / Archiving Policy

All articles receive a unique identifier and are archived in [Portico](#) for preservation. Article DOI-s (<https://doi.org/10.33218.001c.xxxxx>) may be searched in [Crossref](#) and [DOAJ](#). We are members of [COPE](#), and our green archiving policy is registered in [Sherpa/Romeo](#), so either preprint or post-print PDFs (as well as Publisher's versions) can be archived without restrictions. Since January 2023, [Scopus](#) has been indexing Precision Nanomedicine.

We support authors who wish to share their work early through the deposition of manuscripts with preprint servers such as [bioRxiv](#) or [arXiv](#), have previously been presented at conferences, published as a thesis, or have previously appeared in other "non-journal" venues (for example, blogs or posters). Authors are responsible for updating the archived preprint with the journal reference (including DOI) and a link to the published articles on the appropriate journal website upon publication.
